Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 5 and 13 cancelled.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-4, 6-12, and 14-25 are directed to 3 species. 3 species are identified as below.

Species 1 – claims 1-4, 6-12 and 14-18 directed to testing a mobile telephone terminal comprising: transmitting from a test apparatus to the terminal on a downlink a predetermined data pattern which the terminal will recognize and which will prompt the terminal to transmit an access request on an uplink, the terminal receiving said predetermined data pattern and responding by transmitting an access request to the test apparatus on the uplink, and the test apparatus receiving the access request and analyzing the access request to assess the performance of the terminal based upon assessment of the access request alone, **the test apparatus transmitting said predetermined data pattern multiple times at different power levels, and the test apparatus analyzing each access request to determine a power level threshold at which the terminal fails to transmit an access request.**

Species 2 – claim 19 directed to the test apparatus for testing a mobile telephone terminal comprising: **a memory** for storing a predetermined data pattern, **a generator** for generating a signal corresponding to said predetermined data pattern on a downlink,

said signal being adapted to be recognizable by the terminal and to trigger it to transmit an access request on an uplink, and a detector for detecting and analyzing said access request to assess the performance of the terminal, and without replying to the terminal in response to said access request the test apparatus being adapted to vary the power level at which said predetermined data pattern is transmitted and to analyze each access request from the terminal to determine a power level threshold at which the terminal fails to transmit an access request.

Species 3 – claims 20-25 directed to the test apparatus for testing a mobile telephone terminal, the test apparatus being structured and arranged to transmit a predetermined data pattern on a downlink to prompt a response from the terminal in the form of an access request on an uplink, the test apparatus being structured and arranged to analyze the access request and produce a test result based upon assessment of the access request alone, the test apparatus being adapted to analyze the access request by making a modulation quality measurement.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
